conversion of card to secure

A hand-drawn block diagram of a computer system. The central component is a large rectangle labeled "1005". Inside this rectangle, there are two smaller rectangles: the top one is labeled "Embedded software and storage, additional functionality" and the bottom one is labeled "built-in modem (preferred)".

Surrounding the central block are various interfaces and connections, many with handwritten labels:

- Top:** A small circle with a line extending upwards, labeled "wireless to Digital Waller, etc. (required)" and "1350".
- Top-Right:** A circle with a line extending to the right, labeled "1340", "wireless to external modem (alternative)", and "B 35".
- Right:** A horizontal line extending to the right, labeled "B 35", "wired to external modem (alternative)", and "1310".
- Bottom-Right:** A horizontal line extending to the right, labeled "1330", "standard phone or cable modem line, etc.", and "1310".
- Bottom:** A circle with a line extending downwards, labeled "1360", "analog video/audio (optional)", and "1325".
- Left:** A horizontal line extending to the left, labeled "1328", "to host device (PC, etc.)", and "IEEE 1394 interface (preferred)".
- Bottom-Left:** A horizontal line extending to the left, labeled "1325", "standard serial or other interface (alternative)".
